

**Speaker: Dr A-Young Lee, Ph.D.**

**Title:** Scientific Affairs Manager, APAC

**Company:** The United States Pharmacopeia

**Education:** Ph.D. in Protein Biochemistry, The University of Texas Southwestern Medical Center at Dallas, US

Dr. A-Young Lee is a Manager in the Scientific Affairs Group for the APAC region, with a focus on Biologics. Dr. Lee collaborates with scientific experts and stakeholders and is responsible to protect and grow USP's scientific reputation in the region and globally. Prior to USP, Dr. Lee worked for seven years in the field of pharmaceutical therapeutics and medical devices with a focus on tissue regeneration in various surgical areas. Her scientific expertise includes gene manipulation, protein purification and functional characterization, and cell and tissue biology. Dr. Lee is an author of numerous peer reviewed publications on topics such as protein purification and bioassay development, cell manipulation and characterization, and scaffold biomaterials and its application in tissue regeneration.
