

Areas of interest in applications for Pitching event & Networking

Amgen is interested in identifying business development opportunities to discover and develop innovative therapeutics in oncology, cardiometabolic, and inflammatory/autoimmune Diseases

ONCOLOGY

Solid Tumors, including:

- Lung
- Colorectal
- Gastric
- Prostate

Heme Malignancies

- Acute Leukemias (AML, ALL)
- Myelodysplastic syndromes

INFLAMMATION

Dermatology

- Atopic dermatitis, psoriasis, hidradenitis suppurativa

Respiratory

- Asthma, COPD, idiopathic pulmonary fibrosis

Gastroenterology

- Ulcerative colitis, Crohn's disease

Rheumatology

- Lupus, systemic sclerosis

Tolerizing approaches

CARDIOMETABOLIC

- Heart failure & other cardiomyopathies
- Atherosclerosis
- Obesity and related metabolic conditions
- Pulmonary Arterial Hypertension (PAH)

TECHNOLOGY

- AI/ML-based drug discovery platforms
- Target discovery approaches
- Tissue-specific delivery
- Oral delivery
- Therapeutics with regulated or conditional activation for improved safety
- Protein engineering
- New modalities
- Novel formulation
